## When does the framework agreement start and end?

- **23<sup>rd</sup> October 2023 – 23<sup>rd</sup> October 2025** (Extension up to 23<sup>rd</sup> October 2027)

## What does the framework agreement cover?

- The framework agreement provides a quick, simple, and compliant procurement route to market for sustainable waste management solutions for the **NHS and the wider public sector**.

## What are key benefits of using the NHS SBS framework agreement?

- **DIRECT AWARD OR MINI COMPETITION**  
Provides an **PCR15 compliant route to market** and the flexibility to direct award to a single supplier or run a mini competition saving valuable time and resources.
- **DEDICATED SUPPORT**  
**Expert advice available from our team** who are not afraid to roll up their sleeves to get things moving.
- **QUALITY OF SERVICE PROVISION**  
The **experience, expertise and quality commitment of suppliers is assessed during the tender evaluation**, with performance and user satisfaction monitored on an ongoing basis.
- **TOTAL RECYCLING & WASTE MANAGEMENT**  
The framework provides the **ability to source all your requirements** as part of a single solution for recycling and waste management.
- **CONTRACT FLEXIBILITY**  
**Users can embed their own established ways of working** into the process to ensure it aligns with their own internal governance.
- **COMPETITIVE PRICING**  
**Pricing options and capped rates have been secured** with structured and controlled price review provisions from year 2 to ensure our users have cost certainty.

## How does the framework agreement support sustainable waste management?

- Developed to meet sustainability and clinical waste segregation requirements to support compliance with the new **HTM 07-01 (2023 version)**
- Offers **waste repurposing and reuse solutions**, supporting the circular economy.
- **Drives cost savings and sustainability** gains through Waste Consultancy Services. This includes data collection, tracking of waste, behavioural change programs to reduce costs and support waste segregation targets.
- **On-site waste treatment solutions** for reduced road transportation.
- **Innovative technological solutions** to reduce carbon footprints, including microwave solutions, pyrolysis, on-site bio digesters, and aerobic waste digesters.
- Developed to support the utilisation of **waste as a resource**, decreasing volumes of waste taken for off-site treatment.
